PROFESSIONAL SUMMARY

Electrical & Electronics Engineering graduate with hands-on experience in project coordination, technical sales, and engineering support across industrial environments in Malaysia. Experienced in managing project handoffs, coordinating multi-stakeholder deliverables, and supporting end-to-end system delivery from scoping through to commissioning. Seeking a project-based role in industrial automation, systems commissioning, or troubleshooting, where I can apply my engineering foundation and site-level exposure to help bring new systems online effectively.

EDUCATION

Universiti Tenaga Nasional (UNITEN)

Bachelor of Electrical and Electronics Engineering (Hons.) | 2021–2025

- Dean's List, Semester 1 & 2, 2021
- UNITEN Global Scholarship Recipient, 2021

SKILLS

Technical Tools: MATLAB, LTSpice, Proteus, MPLAB, Quartus Prime

Programming: Python (Intermediate), C (Intermediate)

Office & Business: Microsoft Office Suite, Technical Report Writing, Quotation & Proposal Preparation

Languages: English (Fluent), French (Fluent), Tamil (Fluent), Bahasa Melayu (Novice)

Soft Skills: Project Coordination & Handoff, Industrial Automation, Systems Commissioning, Fault Diagnosis & Troubleshooting, Stakeholder Communication, Schedule & Cost Management

PROFESSIONAL EXPERIENCE

ACET Engineering Sdn. Bhd. (AKFA) | Sales Engineer

Johor, Malaysia · Oct 2025 – Present

- Coordinated project-based sales engagements for industrial automation systems, managing scope definition, technical proposals, cost estimation, and delivery schedules across multiple client accounts in Johor.
- Delivered technical solutions for valves, actuators, and electrical control components through site assessments, client-facing presentations, and needs-based engineering recommendations.
- Prepared detailed technical proposals and cost documentation aligned with client engineering requirements, ensuring quality and compliance at each project milestone.
- Supported after-sales project closeout through troubleshooting, quality verification, and client sign-off, maintaining strong post-delivery relationships.

Key Project:

- Automation of Pressing & Auto Feeder Control System, Kim Loong Palm Oil Mill, Kota Tinggi, Johor (Jul 2024 – Jan 2025, 6-month project, valued at RM 600,000): Joined the project in October 2024 as project coordinator for the handoff phase of an AI-driven industrial automation system. Managed stakeholder communication between the client and engineering teams, tracked milestones against the delivery schedule, and ensured all documentation and technical requirements were in order ahead of commissioning. Coordinated on-site testing activities to

validate system readiness and facilitated a structured handover to the client's operations team in January 2025, following successful completion of all acceptance tests.

MAN Energy Solutions | PrimeServ Assist Intern

Kuala Lumpur, Malaysia · Feb 2025 – Apr 2025

- Contributed to a live cross-border remote monitoring project for an operational industrial plant in Vietnam, tracking system parameters against targets and escalating deviations to maintain uptime.
- Supported vendor evaluation processes, assessing solutions against cost, quality, and schedule criteria to inform future project and commissioning decisions.
- Conducted a client plant site visit to gather operational requirements and assess on-site conditions, feeding findings into technical recommendations for the engineering team.
- Developed working knowledge of MAN's rotating equipment portfolio, including barrel compressors, heat exchangers, and turbines, applicable to commissioning and troubleshooting contexts.

OpenSys (M) Berhad | CS Reworks Intern

Subang Jaya, Selangor, Malaysia · Jul 2024 – Sep 2024

- Executed structured rework projects for ATM hardware, including ELO touchscreens, Upper Units, and Reiner Reject Units, managing quality standards and turnaround schedules to hit delivery targets.
- Diagnosed and resolved complex electronic faults using systematic troubleshooting techniques, applying ESD protection and QA protocols to ensure all units met functional standards before closeout.
- Produced Service Work Orders (SWOs) to document project scope, defects, and corrective actions, supporting cost tracking, inventory management, and client reporting.

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

UNITEN Career Ambassador Unit | Company Relations Executive

Kajang, Selangor · Aug 2021 – Dec 2024

- Spearheaded industry outreach initiatives, connecting society members with potential employers and facilitating professional development events.

IMechE UNITEN Student Chapter | Executive of Membership & Registration

Kajang, Selangor · Aug 2023 – Dec 2024

- Managed member onboarding for the student chapter and assisted in organising international and local engineering events.

Electric Vehicle Association, UNITEN | Mobility Executive

Kajang, Selangor · Sep 2021 – May 2024

- Gained hands-on experience with electric vehicle systems, including welding and metal cutting, while collaborating on team EV projects and troubleshooting technical issues.
